 - ◆ SHX: [upcoming graphical wxWidgets version](#)

About this site

In 2008 the [Deutsche Forschungsgemeinschaft](#) (German Research Foundation) funded a project for further development of Seismic Handler. In collaboration with the [Bundesanstalt für Geowissenschaften und Rohstoffe](#) (German Federal Institute for Geosciences and Natural Resources) this project aims:

- new graphical interface
- easier handling of inventory data
- support for more input and output formats
- multi-platform support
- [python](#) interface
- ...

Because there's only one funded position for three years we encourage **you** to participate in every aspect of Seismic Handler. Please **contribute** your scripts, additional programming and so on to us to make it available here for all possible users.

This whole site is a [Wiki](#). As all Wiki pages, this and mostly all other pages are editable, this means that you can modify the contents of this page simply by using your web-browser. Simply click on the "Edit this page" link at the bottom of the page. [WikiFormatting](#) will give you a detailed description of available Wiki formatting commands.

This option is **only available** if you register at seismic-handler.org. Your changes will be kept assigned to your login. Just [register](#) and [log in](#) with your data. Once you have your login, full write access will be also granted for the [discussion forums](#). There are also sandboxes for [wiki format testing](#) and [\[forum:1 forum testing\]](#).

For a complete list of local wiki pages, see [sitemap](#).
