

Prerequisites for installation on CentOS systems

Error: Failed to load processor NewsFlash

No macro or processor named 'NewsFlash' found

Please be sure that you have the following packages installed:

- gcc
- tcsh
- nedit
- imake
- xterm
- openmotif-devel
- libXpm-devel

Using `yum` you can install all necessary packages by running:

```
yum install gcc tcsh nedit imake xterm openmotif-devel libXpm-devel
```

Now proceed with [download and installation](#) of SH/SHM.

Known issues

- CentOS 4 & 5 ships python 2.4 by default and there's no regular update available. All python related functions of SH/SHM may not work.
