text output

command: ECHO <text1>[<text2>[...<textN>]]

Writes text to echo channel (set by ECHO_CH command). Default output channel is the seismic handler text window. All parameters entered are displayed, separated by blanks.

parameters

- <text1>, <text2>, ..., <textN> *parameter type: string*
Text to be written to echo channel, parameters are separated by blanks.

qualifiers

- /no_lf
Writes no line feed at the of the line. Next ECHO command overwrites this one.
- /no_crlf
Writes no line feed and no carriage return at the end of the line. Next ECHO text is appended to this one.

example

```
echo THIS IS A TEST
  writes string "THIS IS A TEST" to the currently selected ECHO-file
```

```
echo DISTANCE ^DISTANCE(2)
  writes string "DISTANCE " and value of distance information of second trace on display to the
  currently selected ECHO-file
```
