## save info entry

**command:** SAVE <entry> <file>

Saves the values of a given info entry <entry> of all traces of the display to a given output file <file>. These entry values can be restored again with the [RESTORE](#) command procedure.

### parameters

- <entry> *parameter type: info entry*  
Name of info entry to be saved.
- <file> *parameter type: filename (without extension)*  
Name of the output file.

### example

```
save T-ORIGIN TO_BJI
    saves the time origin of all traces of the display to the file TO_BJI.STX
```
