

# Style conventions

Standard text is set in proportional font.

*Buttons* and *Menus* entries are display in bold italic.

Monospace font is used to indicate "commands to be executed manually at os shell".

Italic letters point out *filenames* and *environment variables*.

```
file content, program code or multiline commands are enclosed by a box
```

```
program_code = shown * 4;
```

**Something else, but emphasised** is marked in a bold face.
