Content overview

- What is Seismic Handler?
- Download area
- Installation instructions
- Recent release notes
- Frequently asked questions
- How-tos
- Documentation:
  - ♦ SH: command line version
  - ♦ SHM: graphical motif version
  - ♦ SHX: new version

About this site

In 2008 the Deutsche Forschungsgemeinschaft (German Research Foundation) funded a project for further development of Seismic Handler. In collaboration with the Bundesanstalt für Geowissenschaften und Rohstoffe (German Federal Institute for Geosciences and Natural Resources) this project aims:

- new graphical interface
- easier handling of inventory data
- support for more input and output formats
- multi-platform support
- python interface
- ...

Because there's only one funded part-time position til 2013 we encourage you to participate in every aspect of Seismic Handler. Please contribute your scripts, additional programming and so on to us to make it available here for all possible users.

Welcome to seismic-handler.org
This whole site is a Wiki. As all Wiki pages, this and mostly all other pages are editable, this means that you can modify the contents of this page simply by using your web-browser. Simply click on the "Edit this page" link at the bottom of the page. WikiFormatting will give you a detailed description of available Wiki formatting commands.

This option is only available if you register at seismic-handler.org by sending an email to mw(at)seismic-handler.org. Your changes will kept assigned to your login.

For a complete list of local wiki pages, see sitemap.
