

Welcome to seismic-handler.org

This is the development site for the Seismic Handler software package. We provide you with updated documentation and source code via the version control system [?subversion](#).

In 2008 the [?Deutsche Forschungsgemeinschaft](#) funded a project for further development of Seismic Handler. In collaboration with the [?Bundesanstalt für Geowissenschaften und Rohstoffe](#) (Federal Institute for Geosciences and. Natural Resources) this project aims:

- easier handling of inventory data
- support for more input and output formats
- multi-platform support
- ...

Because there's only one funded position for three years we encourage **you** to participate in every aspect of Seismic Handler. Please **contribute** your scripts, additional programming and so on to us.

This hole site is a [?Wiki](#). As all Wiki pages, this and mostly all other pages are editable, this means that you can modify the contents of this page simply by using your web-browser. Simply click on the "Edit this page" link at the bottom of the page. [WikiFormatting](#) will give you a detailed description of available Wiki formatting commands.

If you register at [?seismic-handler.org](#), your chances will kept assigned to your login. Just register? and log in with your data.

For a complete list of local wiki pages, see [TitleIndex](#).
